MEMORANDUM

DATE: SEP 14 1989

SUBJECT: Wetlands/Water Concerns for the Draft RI/FS Work Plan and Sampling Plan, Carrier Air Conditioning NPL Site, Collierville, Tennessee

FROM: Gail Vanderhoogt, Chief
Wetlands Planning Unit *Gail Vanderhoogt*

TO: Felecia Barnett, RPM
SFB, KY/TN Unit
Waste Management Division

The above-referenced reports have been reviewed per the September 13, 1989 request. Based on the limited information provided, an adequate assessment of surface water/wetland concerns can not be provided.

The plan failed to provide the proper illustration(s) denoting the location of the two stormwater ditches in which sampling is proposed, topographic characteristics for the direction of surface water flows, and sufficient information in the site description for an adequate evaluation of the presence of wetlands. This information is needed to determine if the proposed work and sampling locations will adequately evaluate the nature and extent of contaminants both on- and off-site.

Based on the above, we do not concur with the work plan and sampling plan as it relates to surface water/wetland concerns.
